

Aditya Jaiswal – Data Scientist

adi13jaiswal@gmail.com | +91 9794007462 | [Linkedin](#) | Noida, Uttar Pradesh | [Github](#)

PROFESSIONAL SUMMARY

Data Scientist and Machine Learning Engineer with strong experience in **data pipelines, ETL workflows, predictive modeling, and analytics-driven decision making**. Proficient in **Python, SQL, Scikit-learn, TensorFlow**, and statistical analysis, with hands-on experience transforming raw event data into **actionable insights for product and business teams**. Skilled in building **dashboards, automated reports, and ML models** for prediction, optimization, and experimentation. Adept at collaborating across teams to solve complex, real-world problems using data.

PROFESSIONAL WORK EXPERIENCE

Auxiliobits Technologies Pvt. Ltd.

Apr 2026 - Present

Software Developer

Mohali - Punjab

- Developed and maintained enterprise automation workflows using UiPath, streamlining business processes and reducing manual effort across multiple operational tasks.
- Designed data extraction, transformation, and validation workflows to process information from various sources, ensuring data accuracy and consistency.
- Automated report generation and business processes, improving operational efficiency and reducing processing time.
- Integrated APIs, databases, and external applications within automation workflows to enable seamless data exchange and workflow orchestration.
- Collaborated with business stakeholders to analyze requirements, identify automation opportunities, and deliver scalable process automation solutions.

EduLyt India

May 2025 - July 2025

Artificial Intelligence Engineer

Remote

- Designed and maintained **end-to-end data pipelines** for ML workflows, covering data ingestion, cleaning, feature engineering, and model training.
- Built and optimized **classification models** using Python, Scikit-learn, and TensorFlow, improving validation accuracy by **25%**.
- Automated **ETL and exploratory data analysis** using Pandas and NumPy, reducing manual processing effort by **40%**.
- Applied **statistical techniques and hyperparameter optimization** (GridSearchCV, RandomizedSearchCV) to improve model reliability and iteration speed by **30%**.
- Deployed models as **REST APIs using Flask and Docker**, enabling real-time inference and integration with downstream applications.

CORE SKILLS

Data Engineering and Analytics: Data Pipelines | ETL | Data Cleaning | Feature Engineering | SQL (PostgreSQL) | Data Integration | Reporting & Dashboards

Machine Learning and Statistics: Predictive Modeling | Supervised & Unsupervised Learning | Model Evaluation | Statistical Testing | Hypothesis Testing | Time Series Forecasting | Optimization

Deployment & Systems: Flask | FastAPI | Docker | Git | REST APIs | Model Deployment | Cloud: AWS (Basic)

Programming & Tools: Python | SQL | Pandas | NumPy | Scikit-learn | TensorFlow | PyTorch | Matplotlib | Seaborn | Power BI | Postman | Uipath

Concepts: Statistics | Linear Algebra | Probability | Reinforcement Learning | Hypothesis Testing | Data Mining

PROJECTS

Student Performance Metrics – Predictive Analysis Platform

Python | SQL | Scikit-learn | Flask

Live Demo: <https://mlproject-jpyy.onrender.com>

- Built a full analytics pipeline to transform raw student data into predictive insights.
- Developed regression models (**Linear Regression, Random Forest, XGBoost**) achieving $R^2 \approx 0.85$, analogous to LTV / churn prediction problems.
- Designed reusable data preprocessing and inference pipelines, deployed as a Flask web app for real-time predictions.

Math Mentor AI – Intelligent Decision System

Python | Streamlit | ML Pipelines

Live Demo: <https://aditya-j101-math-mentor-app-dvydip.streamlit.app/>

- Designed modular ML pipelines with automated evaluation and feedback loops.
- Improved prediction correctness by **~40%** through iterative optimization.

Air Quality Index Prediction – Time Series Forecasting

Python | Pandas | Scikit-learn | Statistics

Live Demo: <https://aditya-j101-air-quality-index-app-zsy75f.streamlit.app/>

- Developed **forecasting models (SARIMA, Prophet)** with $R^2 = 0.89$, applying statistical testing and correlation analysis.
- Identified key contributing variables through data mining and feature analysis.

EDUCATION

Amity University Noida

BCA - MCA (Dual), Information Technology | CGPA: 7.72

2021-2026

Noida

Certifications: *Python Essentials (Cisco) | AI/ML & Data Science Bootcamp (Udemy) | AWS Cloud Practitioner (AWS) | Building with Claude API(Anthropic)| Claude Code in Action(Anthropic) | Introduction to Agent Skills(Anthropic) | Introduction to MCP(Anthropic)*
